WHY JUST MONITOR MISTAKES...

PREVENT THEM WITH CONTROL

AgOtter is the first of its kind, state-of-the-art, Spray Controller engineered specifically for specialty crops, but diverse enough to work anywhere.

Key Features:

- Take control of your spray inputs to **save** money and **ensure** compliance.
- Easily **calibrate** your sprayer by using the app to learn machine limits and ensuring a correct application rate.
- Never lose **rate control** with patented sensor technology, whether under a clear sky view or full canopy.
- Manage your sprayer fleet for top-end **efficiencies** utilizing live tracking and other software partner integrations.

YOU CAN NOT CONTROL YOUR INPUT COSTS

BUT YOU CAN TAKE CONTROL OF YOUR APPLICATION COSTS.

Problem

The AgOtter Solution

Speed violations or uneven terrain

Controls your rate to ensure your application is uniform, regardless of speed or pressure variations.

Plugged Nozzles/Filter

Alerts Driver in real-time to left and right side variances in application. Daily log reports shows left/right variance.

How much time spent reloading/spraying/driving around

Utilize our cloud software, AgHippo, to gain insight and analyze spray time, idle time or wasted time outside field.

Work order integration from Agronomist

Integrates with software partners to streamline the work order process by sharing and automatically removing human error in data entry.

Regulatory "Use Report"/proof of application

Records all data and optionally reports all spray data in AgHippo to view verification maps and as-applied data.

Sprayer compatibility

Works on any liquid sprayer and for any liquid application.

Canopy too thick to receive GGPS

Uses Patented Technology to track sprayers under the thickest of canopies to ensure proper calibration and tracking.

Ease of use

Utilizes the iPhone/iPad as the spray console for simple and easy setup and applicator awareness.

Spray application Management

Connects with AgHippo Live to track the application live from any device via the web.

Regulatory compliance

Ensure that the sprayer is applying the rate that was prescribed, and prove it.

Ask us about live-tracking and integrations to automate work orders to create an automatic connection between retailers and applicators.
